

Wamee MedKey Keyboard

Single Secure Sign-on

Merging washable design with RFID reader tech from rfIDEAS, Wamee MedKey keyboard leverages the WAVE ID[®] platform to craft a keyboard that marries innovation with a touch of retro flair.

Offering top-tier infection control and swift logon, it's ideal for healthcare settings. With single sign-on security, users tap to unlock workstations and access systems without multiple passwords. By integrating the keyboard and RFID reader, space efficiency is maximised, reducing clutter on work surfaces.

The USB Micro Integrated Card Reader reads 125 kHz and 13.56 MHz credentials, customisable for four card configurations. Backlit for low-light visibility in aqua, blue, or green, it features quieter, faster typing with membrane switches.

Features

- RFID reader
- Waterproof, washable design
- Rated IP68
- Membrane switch for quieter, faster key response
- Quick Connect functionality - USB plug and play connectivity
- Flexible charging via USB interface
- 1-year warranty
