Wamee Power ProDurance Battery System

Run time up to 28 hours

Wamee ProDurance is a safe high powered and self-contained long lasting power management system which is ideal to run computers and peripherals on workstations on wheels. The modular battery cell pack allows for easy onsite maintenance, upgrade or renewal of EOL systems. ProDurance Battery System has an extraordinary run time of up to 28 hours and uses space age cell matching and balancing algorithms to ensure cells charge and discharge evenly to provide long cell life and management.

Features

- Slimline, fanless and robust design
- Up to 28 hours of operational run time
- 4 hour charge covers two shifts requirements
- Efficient DC:DC technology saving up to 30% of battery capacityto extend runtime, battery life and reduce charging, and environmental impact
- LCD display with remaining runtime and battery capacity information
- Plug-n-play
- Front or rear mounted
- Industry leading capacity warranty

For all Mobile power needs:

- General Hospital Ward
- ICU
- Medication Rounds
- Operating Theatres
- Outpatient Clinics
- Aged Care
- Emergency Depts
- Medical Imaging
- Airport
- Mining
- Laboratories
- Agriculture

Upgrade existing Workstation on Wheels Fleet

Save money, landfill and time by supercharging your fleet to the latest mobile power technology. The ProDurance Battery System efficiency, long capacity warranty, modularity and cell pack exchangeability, add up to a significant system cost saving over a cart life versus main competitors.

Upgrading an existing GCX or Humanscale workstation on wheels to the ProDurance Battery System can be done on site in half an hour.
